Two Year Associate Degree Programs

Benefits:

- Cheaper, quicker, and highly vocational, two-year schools offer students the chance to start their careers sooner and with less (or no) debt.
- Students can also use a two-year school as a launching point to start earning your bachelor's degree.
- If you are looking to go directly into a trade or technical vocation, those with blemished high school transcripts looking to work their way into a four-year school, and students who simply want to save money on their general education courses before transferring to a more expensive four-year institution, two year programs is a great option.
- Since 2 year colleges are closely linked to area industries, students will find a wide array of courses that cater directly to the local job market.
- Two-year college students frequently take on apprenticeships and internships within their local community.
- Associate's degrees are best suited for entry-level jobs in a variety of fields such as nursing, respiratory therapy, graphic design, computer programming, medical specialties, and many other professions.
